Teams,

Below is the field driver station configuration that will be used on all fields at the IQ tournament this weekend. If you did not review the first email that was sent out last week it can be viewed on the Robot Events page under the documents tab. It includes important information about parking, Covid policies including visitor limits, volunteer info, and lunch info.

Make sure you have done a self-inspection of your robot to facilitate faster inspection times this weekend. Bring extension cords for charging.

There will be on site regional apparel for sale and drinks and snacks available while supplies last.

Just a reminder that school campuses are tobacco/vape free campuses and you must leave campus to smoke/vape or use tobacco.

Additionally, the FIRST Robotics team The Nerds of Prey will be hosting a 50/50 raffle on both days of the event. $1 gets you one chance to win 50% of all money collected for the raffle. The other 50% goes toward the Nerds of Prey FRC team. Details will be at the check in/volunteer table.
